Lamson	Zeks	

SCHEDULED PREVENTATIVE MAINTENANCE

This program provides you with regular maintenance and the peace of mind your equipment is properly cared for. We schedule preventative maintenance based on the number of hours the equipment operates and we call to confirm the service date. Then, a trained technician performs the service and checks the general operation of the equipment, making note of any other conditions that require attention.

IN SHOP OVERHAUL & REBUILD

Rotary screw air ends, positive displacement blowers, multistage centrifugal blowers/exhausters, and rotary air locks are representative of equipment Air Mac is experienced in overhauling and rebuilding. Qualified, factory trained technicians with years of experience have a proven track record of success.
